Subject: RE: Insurance costs

Importance: High

John Paul: To insure the buildings with a total value of \$1,210,000 (\$110,000 + \$1.1 million) the annual cost is \$3,025.

This location is currently insured for a total of \$1,293,635. The building is insured for \$840,000 – annual cost is \$2,100. Contents are currently insured for \$453,635 – annual cost of \$1,134.09. Combined annual cost (current) is \$3,234.09.

I am checking on flood coverage now and should have an answer soon.

Debbie
